Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 13 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,200,263.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claim 13 are to be found in claims 1-12. The difference between claim 13 of the application and claims 1-12 of the patent lies in the fact that the patent claims include many more elements and are thus much more specific. Thus the invention of claims 1-12 of the patent is in effect a “species” of the “generic” invention of claim 13. It has been held that the generic invention is “anticipated” by the “species”. See *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claim of the application is anticipated by the claims of the patent, they are not patentably distinct.

Claim 13 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,610,009. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claim 13 are to be found in claims 1-10. The difference between claim 13 of the application and claims 1-10 of the patent lies in the fact that the patent claims include many more elements and are thus much more specific. Thus the invention of claims 1-10 of the patent is in effect a "species" of the "generic" invention of claim 13. It has been held that the generic invention is "anticipated" by the "species". See *in re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claim of the application is anticipated by the claims of the patent, they are not patentably distinct.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
